Group Policy-Active Directory Deployments of Localized Foxit PhantomPDF

1. .iso format: Unzip the .iso file.
   .exe format：Run "FoxitPhantomPDF_Business_Setup.exe /extract" from the command line to unzip the msi and .mst files to the current directory.
2. Use the command "msiexec /a　Foxit PhantomPDF_Business.msi" to extract the package into the shared folder. Save the unzipped **Transforms** folder into the directory which includes the extracted package in the shared folder.
3. Deploy Foxit PhantomPDF via GPO deployment on the Server. (Take Assigned deployment method as example.)
   1) On the Server, choose **Start** > **Administration Tools** > **Group Policy Management**. In the **Group Policy Management** dialog, right-click a created GPO and choose **Edit**.
   2) In the pop-up **Group Policy Editor** dialog box, choose **Computer Configuration** > **Policy** > **Software Settings**, and right-click **Software Installation** to add the installation package "Foxit PhantomPDF_Business.msi". In the **Deploy Software** dialog box, choose **Advanced** and then click **OK**.
   3) In the pop-up **Foxit PhantomPDF Business Properties** dialog, choose the **Deployment** tab, check the options of "**Uninstall this application when it falls out of the scope of management**" and "**Install this application at logon**" and then click **OK**.
   4) Switch to the **Modification** tab. Add your .mst file in the **Transforms** folder (that defines which language you want to install) and click **OK**.
      Note: Please make sure you have added the .mst file before you close this properties dialog. Otherwise, you will not be able to add it after closing the properties dialog and will have to do the configuration again.
   5) In the **Deployment** tab, click the **Advanced** button, check the option "**Ignore language when deploying this package**" in the pop-up **Advanced Deployment Options** dialog and click **OK**.
   6) Use the command "gpupdate" to update the group policies for both server and clients. And then log in the computer which has been added earlier in the Organization Unit (OU). You will find that Foxit PhantomPDF with target language has been installed automatically on your desktop.
