TABLE OF CONTENTS

1 OVERVIEW

WebPDF Reader Demo is a simple website built on WebPDF SDK. This guide will introduce how to use the functions of WebPDF Reader Demo.
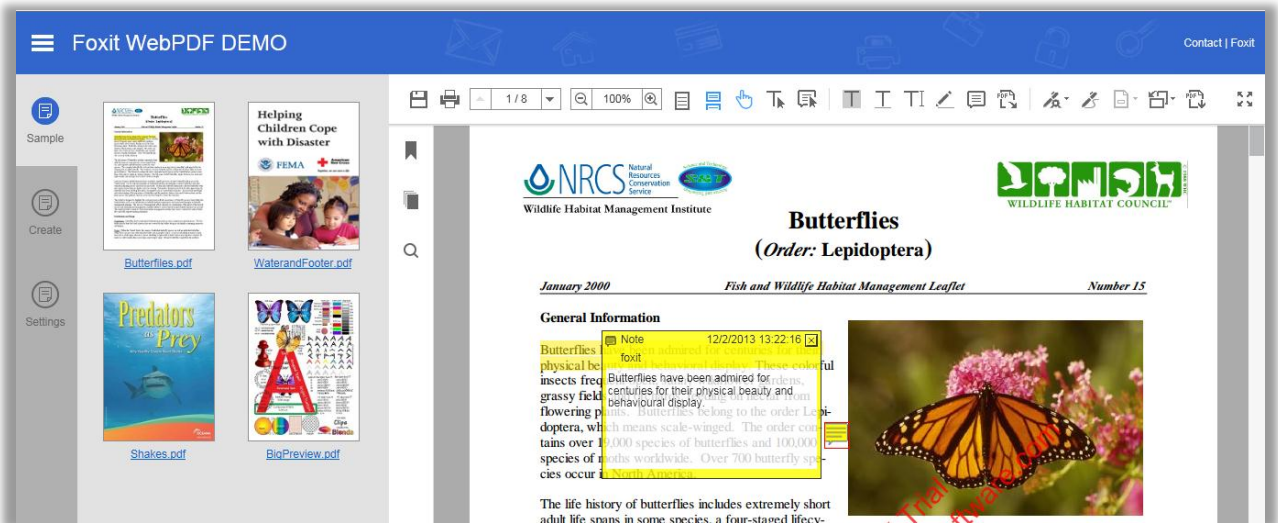

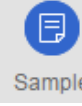

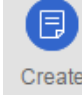

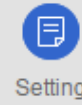

2 HOW TO USE

After installing WebPDF SDK, you can try WebPDF Demo from: http://localhost:8081/foxit-webpdf-web/

2.1 View PDF documents on desktop

2.1.1 Demo panels

Functions on Demo panels:

Panel	Name	Description
	Sample	View sample PDF files.
	Create	Upload a local document or input URL to view a public PDF document on the Internet.
	Setting	Enable or disable the tools in the toolbar along with other features.

2.1.1.1   Choose a file

In the "Create" panel, you can input a public document URL to open a file or choose a PDF file from local drives to view on the WebPDF Reader.
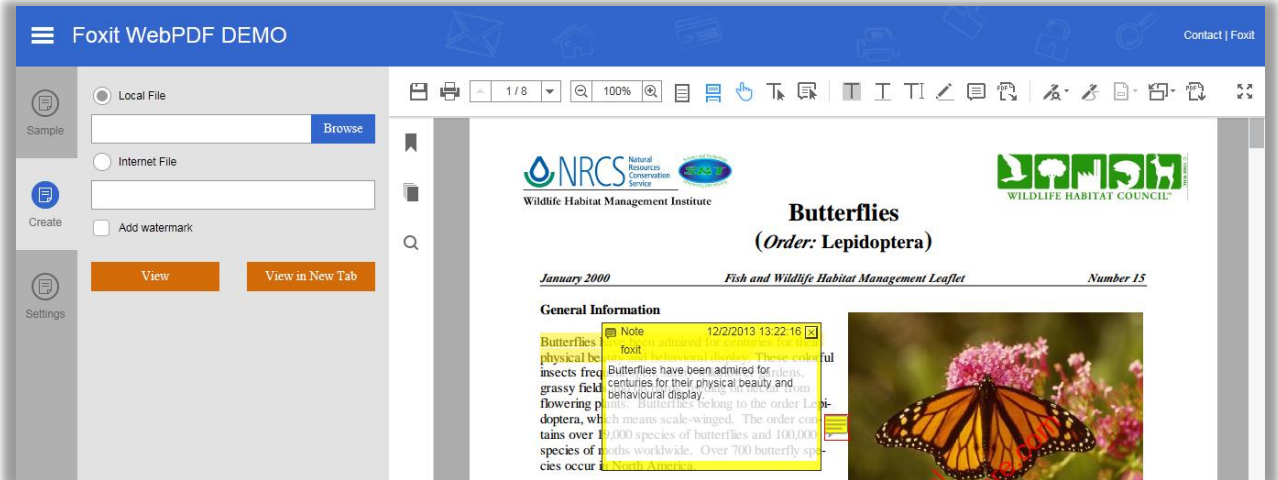

2.1.1.2   Add Watermark

A watermark is useful for indicating ownership information, which also prevents unauthorized distribution of the document through screenshots. The watermark will be printed out with document.

Click **Add watermark** in the "Create" panel, and specify the settings as shown below.

You can choose fixed or dynamic watermark. For a dynamic watermark, you can choose **User name**, **IP**, **Open time**, or all three.

2.1.2　View PDF documents

When your PDF document is ready, click the **View** button to read it online. The WebPDF 1.2 support PDF document security restrictions permission. The permission is include Printing, Comment in the document, Content copying for accessibility, and Signing.
You can read and annotate PDF documents from which you can also export the annotations onto the desktop. While press ESC, the shape of mouse will return to hand model that no matter what kind of tool is using.

Tools on toolbar:

Tool	Name	Description
💾	Save	Save the current annotated file to the server.
🖨	Print	Send a document to an inkjet or laser printer and print it out with custom page sizes. Since the document is in the server, WebPDF will download the printing data and then print.
▲ 2 / 8 ▼	Page	Navigate to the previous page or next page.
🔍 100% 🔍	Zoom In/Zoom Out	Change the zoom level.
☰	Single page	View one page at a time.
☰	Continuous	View pages continuously with scrolling enabled.

	Hand	To move a page, please select the Hand tool, click and drag the mouse to move the page.
	Text Selection	Select a word: Double-click the word you want to select. Select a line of text: Click and drag the cursor over the line of text you want to select.
	Annotation Selection	Select an annotation to view, edit or delete.
	Typewriter	Add text comments anywhere in a PDF.
	Note	A note comment has a note icon that appears on the page and a pop-up note for the text. The message box can be resized and will wrap around when you enter more text.
	Highlight	To mark important passages of text with a fluorescent (usually) marker for later reference.
	Underline	To draw a line under the text to indicate emphasis.
	Pencil	To draw free-form shapes.
	Export FDF	Export the annotation data in FDF format to local.
	Signature tool	Add digital signatures to PDF files, including Normal signatures and Cross-page signatures.
	Ink Signature	Create, manage, and apply ink signature. It supports with/without digital certification.
	Form	Acroform form filling, import form data from a file or export form data to a file.
	Download	Download an annotated PDF file to a local drive.
	Rotate Page	Counterclockwise/clockwise rotate page view in 90°.
	Full screen	View document in full screen mode.

Right-click menu:

| Operation	Description
On the view	To change the zoom level, navigate to the previous/next page or show

	the document properties.
On selected text	To highlight, underline, or copy selected text.
On a annotation	To delete selected annotation.

Navigation panel:

| Panel	Name	Description
🔖	Bookmark	View document bookmarks.

Internet File

http://10.103.4.154:63051/test/sample.pdf

☐ Add watermark

View
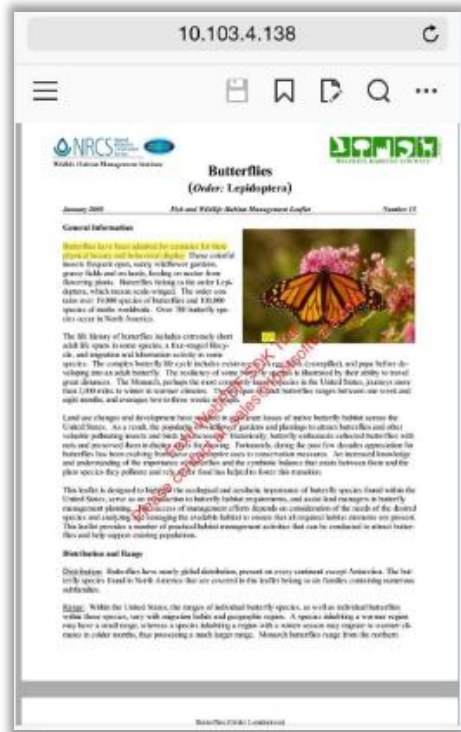

2.2.1.2   Add Watermark

You can also add watermark. See 2.1.1.2 Add Watermark.

2.2.2   View PDF documents

You can switch pages by swiping up or down with your finger on the screen.

Zoom in or out a document by using two-finger pinch and stretch gesture or double tapping on the screen. Whether the page view will zoom in or out depends on the current magnification.

| Tool	Name	Description
🖫	Save	Save the current annotated PDF file to the server.
🔖	Bookmark	View the bookmarks and page thumbnails in the current document.
📝	Comment	Add comments to the document. Annotate documents using Line, Highlight, Underline, Note, Typewriter, and Pencil tools.
🔍	Search	Search text in the current document and list text-searching results with page info and details.
•••	More	Click to see more features.

Annotation Tools:

Foxit WebPDF provides a set of annotation tools to help you comment on PDFs.

Annotation tools contain Text Markup tools (including Highlight and Underline tools), Typewriter tool, Pencil tool, Note tool and Ink Signature.

Tool	Name	Description
T	Highlight	Mark the selected text with a fluorescent color.
T	Underline	Mark the selected text with a line under the text.
TI	Typewriter	Add text comments in a PDF document.
✎	Pencil	Mark up PDF content by drawing free-form shapes.
💬	Note	Add comments anywhere to record ideas and input text in the pop-up box.
✍	Ink Signature	Create, manage, and apply ink signature. It supports with/without digital certification.

To bring out the Copy tool, Highlight tool or Underline tool, you can alternatively tap and hold anywhere on the PDF file, and then choose the tool from the pop-up menu (as shown below).

To delete the annotation made before, you can tap the markup you want to delete, and then choose "Delete" from the pop-up menu (as shown below).

You can use Ink Signatue tool to sign the document with your handwriting. It supports with/without digital certification. And you can set color and thickness properties to define what your handwriting likes (as shown below).

More Tools:
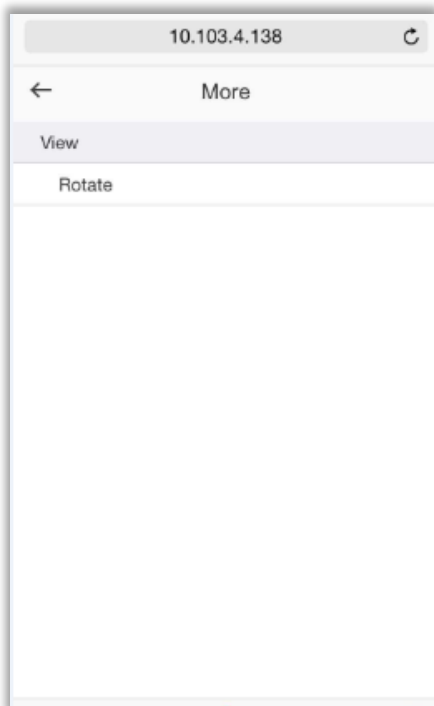

Rotate Tools:

Counterclockwise/clockwise rotate page view in 90°.
