Chapter 8 – Forms

Foxit PhantomPDF is extremely useful for form filling and form designing. Please read below for more information.

Interactive Form and Non-interactive form

There are two kinds of “form” files. One is a PDF file with fillable fields, which enables you to fill the form directly by clicking the form fields without using other features. This is called an Interactive PDF Form. The other kind of form is a plain PDF file with lines and texts, which should be filled with the typewriter feature in Foxit PhantomPDF. This is called a Non-interactive PDF Form.

Interactive Form

For interactive forms, you will see a document message bar appear between the toolbars and the form itself. If you do not want to see it again when reopening this file, please choose FILE > Preferences > Forms > Always hide document message bar. To show it, redo the steps.

The left side of the message bar typically informs you that this document is a fillable form. The right side of the message bar has two buttons. One is a Highlight Fields button, which colors the backgrounds of all blanks to be filled in and outlines any required blanks, making it easy to see them at a glance. Click it to highlight all fields or cancel the highlight. Another button is a Close button.

Acro Form and XFA (XML Forms Architecture) Form

Foxit PhantomPDF now supports both Acro Form and XFA Form. You can fill in XFA forms with the Hand Tool, the same which you were able to do with normal fillable forms (also known as Acro Form).

Non-interactive Form

The document message bar will not appear. This kind of form acts like an ordinary PDF document that has plain text and you will need to use the Typewriter feature to fill in this form.

Fill in PDF Forms

Foxit PhantomPDF not only allows you to fill in PDF forms and print them out, but also supports advanced form operations, such as saving filled-out forms and importing/exporting forms data.

Fill Interactive Forms

If a PDF form contains interactive form fields, you can fill in the form with the Hand Tool. When you place the pointer over an interactive form field, the pointer icon changes to one of the following:

- Hand icon -- Appears when mousing over a button, radio button, check box, or item on a list.
- I-beam icon -- Appears when you can type text into the form field.

To fill in an interactive form, please do the following:

- If necessary, select the Hand tool .
- (Optional) To make form fields easier to identify, click the Highlight Fields on the document message bar. Form fields appear with a colored background (light blue by default).
- Choose FORM > Form Recognition > Run Form Field Recognition. Then click on the first form field you want to fill in, either to select that option or to place an I-beam pointer in the field so that you can start typing.
- Right-click the text fields, and choose Paste or Select All to do other operations.
- After making a selection or entering text, do any of the following:
  A. Press Tab or Shift + Tab to accept the form field change and go to the next or previous field.

  C. Choose FILE > Save As, and specify a location for the copy.
Clear a form entry

• Select the reset form button if one exists. You can’t undo this action.
• Quit the browser, and start again.

Note: Clicking the web browser’s Reload or Refresh button, the Back or Go Back button, or following a link to another page may not complete clearing the form.

Fill lengthy entries in forms

Some PDF forms can contain dynamic text fields, which changes the text you input in size to accommodate the text fields. The text appears smaller and smaller when the words you type exceed the current size of the field.

Spell-checking form entries

You can spell-check the text you typed in form fields after purchasing Foxit PhantomPDF if the security settings allow.

If you have installed the Spell Checker, when you insert any English text in the form fields, the spelling errors will be highlighted and underlined with squiggly lines.

To spell-check entries, do the following:

• Right-click on the misspelled words and you will see a list of five suggested words.
• Choose one of the suggested words to correct your input or ignore the squiggly line.
• If all the suggested words are not the exact words you want to input, try to correct them with other words.

Fill Non-interactive Forms

Non-interactive PDF forms can be printed and filled in by hand. Or choose COMMENT tab > Typewriter group > Typewriter Tool to type information over the blank form fields and then save or print a copy of the completed form. Comment on Forms

You can comment on PDF forms, just as on any other PDF. You can add comments only when the form creator has extended rights to the users.

Whether or not these comments are included when the form is submitted depends on how it is submitted. For example, if you use Foxit PhantomPDF to print the form for mailing or faxing, the comments do not appear. But if you attach the filled-in form to email as a complete PDF, the comments are included. Also, you can send the comments separately as an email attachment.

See also “Chapter 6 - Comments”.

Manage Form Data

You can import form data from other file formats to a PDF form, or export form data on a PDF form to other file formats. You can also export form data from multiple PDF forms to a CSV file.

Import/Export Form Data

Foxit PhantomPDF Add-ons

Foxit PhantomPDF provides separate add-ons to increase product capability. Most of the add-ons, including JPEG2000/JBIG Decoder, Spell Checker and Firefox Plugins, have been integrated into Foxit PhantomPDF package. There is no need to install them separately.

If there are any upgrades of those add-ons, you can go to HELP > Check for Update to download and install the latest version. See Updating Foxit PhantomPDF. You can also get new available add-ons from HELP > Check for Update using the same procedure.

Updating Foxit PhantomPDF

Foxit PhantomPDF main program along with add-ons can be updated from the HELP menu. Foxit PhantomPDF also has an auto-update feature. Whenever there is a new version detected, Foxit PhantomPDF will prompt you to update.
Updating from the Help Menu

1. Choose HELP > Check for Update.
2. In the pop-up dialog box, select updates from the column on the left, and click Add to move them to the right column. Only the updates and components appropriate for your product will be listed. Click Next to download and install the update.
