

MEREDITH COLLEGE TAKES ONLINE LEARNING TO NEW HEIGHTS WITH FOXIT

MEREDITH
COLLEGE

CASE STUDY

When Meredith college transitioned to online learning, they were worried it would be difficult for students and staff. Being a smaller school, they had to balance the needs for a powerful PDF solution with something that would also fit into their budget. That's where Foxit came in. Jennie Robinson Hayes, Technology Services Coordinator at Meredith explained

"Foxit was something we could turn to! it is easy to use and easy to adopt, especially with all the new features."

Onboarding made easy

Meredith College has staff with a variety of different skill levels when it comes to technology. It was important for them to find a program that would be easy for staff to use, but still had all of the features they knew they would need for success with online learning. Foxit's familiar interface and user friendly tutorials made it easy to onboard staff, and the powerful features help staff make the most of their time with students.

"We were prepared for the shift to digital from paper to be a challenge, but Foxit made it easy for our staff to get up to speed in no time."

– Jennie Robinson Hayes, Technology Services Coordinator

Being able to create and sign digital forms quickly has helped staff be more efficient and allows them to easily share forms and assignments with students. Plus, Foxit's accessibility features ensure that everyone can interact and engage with the content.

Powerful Features with Flexibility

Meredith College's technology team knew they would need a PDF editor that was as flexible as their students and staff. Other PDF editors made it difficult and costly to add on additional users, and costs were subject to change from year to year. Foxit's straightforward licensing, flexible renewal models, and ample customer support made it easy and affordable to roll out their PDF editing software to the entire school, while also staying in budget.

"We picked Foxit because we could actually fit it into our budget for the whole school to use, and adding new students is a breeze."

– Jennie Robinson Hayes, Technology Services Coordinator

Meredith is a private college in Raleigh, N.C. with an enrollment of 2,000 students across its undergraduate and graduate programs. It is known for educating and inspiring students to live with integrity and provide leadership for the needs, opportunities, and challenges of society.

The scope and accessibility of features Foxit offers exceeded Meredith College's expectations. With new features and updates being made regularly, Foxit meets the ever-evolving needs of today's educators—even in the midst of a global pandemic.

"It is really nice to partner with a company who truly cares about their customers and product."

– Jennie Robinson Hayes, Technology Services Coordinator

Finding a PDF editing software that can meet every priority a technology department has can be a challenge, but with Foxit it doesn't have to be.

"When I was looking into PDF software, my priorities were functionality, accessibility, and price. Foxit was the top solution in all of those categories."

– Jennie Robinson Hayes, Technology Services Coordinator
