

Do More With Documents

## Accessibility Made Easy with Foxit PhantomPDF *Business*

Remediating a single document for accessibility requires resources in labor and time. PhantomPDF has all the tools to adhere to government and international requirements to quickly turn scanned and born-digital files into Section 508-compliant documents that are accessible for users with visual and mobile impairments.

### WCAG 2.0 Standard Compliance - Make documents usable to all

All of PhantomPDF's solutions abide by WCAG 2.0 AA, the highest standard for accessibility, ensuring documents can be read by people with disabilities and screen-reading software.

### Auto-tagging - Eliminate manual processes

PhantomPDF's auto-tagging capability converts an un-remediated file into an accessible document within minutes, saving time, effort, and money. *Autotag Document* identifies and classifies all elements of your document -- text, headings, images, tables, lists, form fields and more.

### Action Wizard - Step-by-step guidance to automating accessibility

Have all the necessary steps prepared before tagging a document. *Action Wizard* walks you through a quick and essential setup guide to make remediation as error-free as possible.

### Area Reading Order - Reorder content the easy way

The traditional way of setting reading order is repetitive and error-prone. *Area Reading Order* is an exclusive feature from PhantomPDF that provides a quicker and more intuitive way to arrange how document content should be read. Just draw areas around specified properties within a page and rearrange their order to the way you want screen-reading software to read it.

### Alternate Text - Add supplemental text all in one go

Adding alternative text to a document's images is one of the most basic principles of accessibility. Rather than manually going through a document, PhantomPDF's *Alternate Text* feature automatically detects all images and lets you set the alternate text or designate as a decorative image.

### Accessibility Check - Instantly verify levels of accessibility

*Accessibility Check* runs a detailed report to help you evaluate whether your tagged PDF files meet WCAG 2.0 standards for accessibility. The report pinpoints problematic areas in your document and how to further remediate them, saving you from guesswork.

**Do More With Documents**

## Automate High-Volume Document Accessibility Foxit PDF Compressor / Rendition Server

Complying with digital document accessibility standards can seem like a daunting undertaking. Spend less time manually tagging documents by using automation to create more accessible materials as part of your document generation process.

### Advanced Auto-Tagging

To function properly, screen readers and other assistive technologies require text layer data. Save time and reduce costs with a solution that will automatically create tagged PDFs from both electronic files and unstructured, scanned documents.

### Better Customer Experience

In a 2015 WebAIM survey of screen reader users' preferences, about 50% of respondents found PDFs difficult to read. Improve customer experience by creating PDFs that people using screen readers can understand and work with. Accessible documents can be generated in PDF/A-1a, PDF/A-2a, and PDF/A-3a formats.

### PDF Accessibility Compliance

Avoid lawsuits and trouble with regulatory bodies by working toward accessibility compliance standards. We can help organizations in education, government, and other regulated industries comply with mandates around 508 compliance and avoid costly litigation.

### Digital Document Handling

Preserve, improve, or replace existing tagging structures in digital documents for flexible accessibility processing according to your needs.

### Optimize Documents

Make your documents more efficient to work with, lower ownership costs, and meet compliance requirements using automated, enterprise-ready PDF conversion technology. Make your files highly compressed, searchable, and accessible with large scale automation.

### Fit with Your IT Modernization Strategy

Use auto-tagging and PDF conversion in a traditional server folder structure or deploy as a made-for-cloud web service with robust integration tools.

### One Software Fits All

Born digital or scanned, structured or unstructured, our solutions can handle it all. PDF Compressor uses multiple methods to ensure that no matter the document type, you can get the most accurate tags in the way that makes the most sense with your documents and processes.
