A Unified Platform for Modern Document Automation

From creation to signature to archive, Foxit APIs deliver full-stack PDF and eSign capabilities.

PDF Services API

Automate document creation, editing, conversion, and optimization.

- ✂ Generate and format documents at scale
- ✂ Convert to/from PDF (Word, Excel, HTML)
- ✂ Compress, split, merge, and extract
- ✂ Redact and secure content

eSign API

Power embedded, automated eSigning workflows.

- ✂ Trigger signing from CRMs or workflows
- ✂ Capture consent and maintain audit trails
- ✂ Manage signer flows, identity, and branding

Document Generation API

Turn templates into personalized documents with dynamic data.

- ✂ Populate names, pricing, and tables from CRMs or forms
- ✂ Automate quotes, contracts, disclosures, and more
- ✂ Output branded PDFs or DOCX files at scale

PDF Embed API

Deliver frictionless in-app viewing with full control.

- ✂ Embed lightweight PDF viewers
- ✂ Enable annotations, form-filling, and collaboration
- ✂ Control access without downloads or plugins

Why Enterprises and Developers Choose Foxit

Built for compliance. Trusted for speed. Ready for scale.

For CIOs & IT Leaders

- ✂ API-first architecture with flexible deployment
- ✂ Strong compliance: SOC 2, GDPR, HIPAA, eIDAS, 21 CFR Part 11
- ✂ Cloud-native performance with SLA-backed reliability

For Developers

- ✂ Clean REST APIs with real-time sandbox
- ✂ Pre-built workflows for quick deployment
- ✂ Full documentation, SDKs, and live code demos

For Security & Compliance Officers

Power embedded, automated eSigning workflows.

- ✂ Encryption (TLS 1.2+, AES-256) in transit and at rest
- ✂ Role-based access control (RBAC)
- ✂ Tamper-evident audit trails and identity verification options
