Foxit

The #1

DocuSign Alternative

Foxit eSign is easier to set up, easier to use, comes with better support, and is a better partner than DocuSign.

Foxit

Innovation Beyond eSignatures

	Foxit eSign Business	DocuSign Business Pro
Pricing	$300 / Per User, Per Year	$480 / Per User, Per Year
Templates per month	Unlimited	Unlisted
Envelopes per month	Unlimited	8
Foxit eSign Salesforce App Generate quotes, invoices, agreements, and more directly in Salesforce Upload or create a template and map the template fields to fields in Salesforce. Send for signature, track, and more without leaving Salesforce.	✓	✕
Foxit PDF Editor Customize and send out documents directly from the Foxit PDF Editor. This add-on gives you full access to Foxit eSign's suite of features directly inside the Foxit PDF Editor.	✓	✕
WordPress Forms Accept eSignatures and deliver documents seamlessly, directly through WordPress forms.	✓	✕
APIs Leverage our API technology with SDKs for C#, Java, JavaScript, Python, Ruby, and PHP, allowing for an easier integration journey for your whole team.	✓	✕
Multi-Language Support Send the same document to multiple people with email templates in different languages to facilitate fast and easy eSigning.	✓	✕
Enterprise Authentication Verify identity with User Defined Access Codes allowing the requester to send the signer a code to enter before they sign or Knowledge Based Authentication (KBA) requiring signers to confirm personal information.	✓	✕
Qualified eSignatures (QES) Qualified Electronic Signatures, or QES, are equivalent to a handwritten signature in terms of legal effect under eIDAS standards. In-app registration in ZealiD verifies the recipient's personal digital signature and identity.	✓	✕

Audit Trails and Certificates Audit Trails and Certificates are generated after a document is completed. Data includes location, IP, recipient, date, consent, security level, name, a summary of Envelope History, and more.	✓	✓
Secure Cloud Storage Signed documents are stored and available for secure access at any time by authorized users. Plus, when a document is signed, both the requester and signer are sent digital copies.	✓	✓
Mobile App Our full-featured apps on iOS and Android allow users to create documents for eSigning from anywhere and on practically any device. Scan documents to turn them into signable forms, send for signature, track, and more.	✓	✓
Digital Signatures Foxit eSign maintains the unique identity of each signer and can produce a unique identification as well as a digital signature, providing the necessary digital certificates that protect the signature certificate validity.	✓	✓
Stamps Utilize the embedded stamps feature with Foxit eSign, or upload your personal stamps, notary seals, and more as an image file directly onto your document.	✓	✓
eSignature Authentication Send a document or envelope to a signer's unique email address for signature. Optionally, provide the signer a code to open the document. No additional download or signup is required.	✓	✓
SOC 2 Type 2 This certification is crucial for service providers that handle sensitive data, as it assures clients that their data is managed in a secure and compliant manner.	✓	✓
ISO 27001 Being ISO 27001 certified demonstrates that an organization has implemented an effective information security management system (ISMS) and is committed to maintaining high standards of data security.	✓	✓

Innovation Beyond eSignatures

	Foxit eSign Business	DocuSign Business Pro
Compliance Compliance with eIDAS, ESIGN, UETA, FINRA, CCPA, FERPA, GDPR regulations.	✓	✓
Bulk Sending Send personalized versions of the same document to a group of people simultaneously. Each document is separately tracked and maintained.	✓	✓
Advanced Forms Fields Utilize advanced fields such as Secured, Image, and Hyperlink, together with Accept and Decline buttons. Also access multiple validations and customize validations using RegEx. Even use conditional logic on your forms.	✓	✓
In-Person Signing eSign in-person with a user from the Foxit eSign account administrating the signing session. The signing administrator gives control to the recipient to fill out the document and sign.	✓	✓
Offline Mode Use our mobile apps to collect a signature on documents even when there is no network coverage. Once the device is back online, the signed document will sync.	✓	✓
Cross-Device Support Easily collect handwritten signatures from a separate device such as a signature pad, an uploaded image of a signature, or by collecting a signature from another touch-enabled device.	✓	✓
Manage Users and Teams Manage users, monitor activity, control access, and more with just a few simple clicks.	✓	✓
Account Delegation Foxit eSign Account users can delegate alternative user access to their outstanding tasks and follow-ups during special circumstances, such as vacations and during emergencies.	✓	✓
eSigner Delegation With the eSigner Delegation feature, document recipients can delegate signature tasks to a different person when not able to sign for reasons beyond their control.	✓	✓
